Educating with Unifiedknowledge: Foundation Course One

Parents and teachers: Is this home learning course for you?

Yes if you wish to become more insightful (and knowledgeable) about the true importance of culture in learning, this can make the difference between your children really connecting to their natural talents and capabilities or them becoming ("maturing" into) self-restricted human beings. Now is the time to look carefully at your own development as an educator. Are you rarely treated to this kind of learning?. Think about it.

High culture; it's more than reading about history, the way people dress or what they eat. Its about total freedom of expression in harmony with One's essential nature and heritage. It's a journey (a process), and **Educating with Unifiedknowledge** will be a step in the right direction that you, your family or learners come to really really value.

Learn with us:

- Millions of people successfully learn this way.
- A trusted qualification from an organisation with community development integrity and a powerful network of education partners.
- Study from home (and with social networks), at your own pace.
- Full support from your tutors and our administration team.
- Easy to understand course materials

How it works:

- Enrol online today
- Instalment payment options available
- Course study pack delivered to your door.
- Follow your study guide, supported by easy to use online learning systems.
- Our tutor teams help you all the way.
- Our learners' cooperative friendly forums provide peer-to-peer support and collective community support.
- Send in your work by post, email, online or bring it into one of our affiliate centres.

Support good causes while you grow.

Your enrolment in this course supports the charitable projects of Abundance Centres (UK) who work globally to strengthen the brilliance of children and their families.
